

ClearEdge Power Receives CSA Certification, Meets Demanding Industry FC-1 Standards

CSA Listing Certification Further Validates Performance, Safety and Reliability of ClearEdge Power Systems

HILLSBORO, Ore. – February 7, 2012 – [ClearEdge Power](#), a manufacturer of scalable, continuous onsite power systems, today announced that its outdoor [ClearEdge5](#) system has received CSA certification and listing to ANSI/CSA Americas FC-1. The CSA certification mark assures major retailers, distributors, regulators and consumers that the ClearEdge5 underwent rigorous testing to meet the U.S. and Canadian industry standards for safety and performance.

“The globally recognized CSA certification mark is another validation of the performance, safety and reliability of our products,” said [Mike Upp, vice president of marketing at ClearEdge Power](#). “ClearEdge Power is focused on driving broad market acceptance of stationary fuel cells and this certification is another important milestone in the process.”

To obtain CSA certification, ClearEdge Power worked closely with CSA International, a leading global testing, inspection and certification organization and was evaluated by a formal process involving examination, testing and follow-up examination to obtain the valued certification and listing. Additionally, the ClearEdge5 will now be listed on CSA International’s webpage along with other CSA listed products, and is now entitled to bear the CSA Blue Star and the CSA mark.

The CSA certification builds on ClearEdge Power’s forward momentum seen in the past year. Recent highlights include a record-setting agreement with [Güssing Renewable Energy](#) and the expansion of ClearEdge Power’s portfolio of [continuous onsite power systems](#), including industry-first innovations in areas such as reliability, scalability and flexibility. In addition, ClearEdge Power has continued to see strong customer adoption in a variety of industries, including multi-tenant housing, hospitality, education, utility, public sector and residential.

About ClearEdge Power

ClearEdge Power provides distributed energy generation solutions to commercial, institutional and residential customers. The company designs, manufactures and sells a family of continuous onsite power systems that uses fuel cell technology to efficiently deliver predictable, clean and cost-effective power and heat. This enables customers to increase independence from the electricity grid, save money and reduce greenhouse gas emissions. For more information, please visit <http://www.clearedgepower.com>

About CSA International

CSA International is a global leader, providing worldwide product testing and certification services. CSA International is recognized in the U.S., Canada and around the world, as an accredited provider of product testing and certification services for electrical, mechanical, plumbing, gas and a variety of other products.
